DETAILED ACTION

The Group and Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Amy DeCloux, Group Art Unit 1644, Group 1640, Technology Center 1600.

Applicant's response filed 8-30-02 (Paper No. 9) to the restriction requirement mailed 7-31-02 (Paper No. 8) is acknowledged. However, in view of Applicant's newly added claims, the previous restriction requirement has been withdrawn, and substituted with the following restriction requirement.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 25-26, drawn to a method of treating a patient suffering from psoriasis comprising administering to the patient an antibody that binds interferon gamma, classified in class 424, subclass 139.1.
- II. Claims 25-27 and 33-42, drawn to a method of treating a patient suffering from psoriasis comprising administering to the patient an antibody that binds interleukin 12, classified in class 424, subclass 139.1.
- III. Claims 25-26, drawn to a method of treating a patient suffering from psoriasis comprising administering to the patient an antibody that binds an alphaR integrin subunit, classified in class 424, subclass 139.1.
- IV. Claims 43-44, drawn to a method of treating a patient suffering from psoriasis comprising administering to the patient a pharmaceutical formulation comprising

Art Unit: 1644

an interleukin 12 receptor or subunit thereof , classified in class 424, subclass 139.1.

Note: Each Group will be examined only to the extent of the elected invention.

The inventions are distinct, each from the other because of the following reasons:

Groups I-IV are unique methods. They differ with respect to the administered reagent, each of which has a unique structure and associated biophysical properties. Therefore, they are patentably distinct, each from the other.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and because a search in the non-patent literature of any of these distinct inventions would not be co-extensive with a search of the others, an examination and search of two or more inventions in a single application would constitute a serious undue burden on the Examiner, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
